

Network camera records real-time changes in the streetscape

Look at home in front of the New York Restaurant wild eyes

August 17, 2009

Recently, a very wonderful picture attracted the interest of many users. It is said that the plan is to install a street corner in New York by the camera to take pictures of the street, if the non-stop to refresh the page, the screen will be real-time changes, you will be able to live the same as watching TV to enjoy what is happening locally. Users verify the authenticity of curiosity, and posted their replies in the screenshot to see the scenes, some network experts in the interpretation of the whole story, while also posted a screen around the camera to other links. This "dynamic images" popularity is continuing to heat up.

Seen from the screen, this camera installed in the street by TGIFriday's restaurant of the left side of the top, which can be seen not far from the narrow crossroads and pedestrian traffic. Every time the page refreshes, the screen will occur, whether large or small changes. "This map of the cattle too, and diving (with do not see replies) I have bombed out in the future to monitor every day!" Friends said FRIDAY replies.

Wonderful picture immediately attracted the interest of many users, is described in its own thread to refresh the page to see the scene: "I saw a pair of lovers", "a musical instrument of the people slowly back step", "now a red light, "" The United States has dirty streets ", " a baby carriages come here "... .. In addition, some users also attach screenshot replies. It has been observed, each map shows that there are differences between the scenes. Interestingly, in certain shots, a pair of middle-aged husband and wife found this camera, excited smile and waved towards the camera.

"Amazing! This map screen is in New York?" After the majority of people are trying one after another to verify its authenticity. Reporter noted that users in the process proved to be given the following reasons:

First, the time difference. "There should be a New York street, I see that time the afternoon or evening, is now during the day, on the screen for the real-time monitoring, from which China and the United States time zone conclude that the map is real. Reporter then tried to refresh the page at different times, the statement confirmed.

Second, in a short period of time to refresh the page, the screen changes the location of figures showing a before and after correlation. In addition, users also are given a picture link to another Web site, the only difference is that about every 5 seconds automatically refresh, looks like a continuous movie.

Third, the attire. New York is in summer. The shuttles on the streets are dressed in summer attire, in line with the actual situation.

A simple map, Earth in real time watching the other side of the street scene? Just as people were puzzled by this, the users are given the answer; Vampoleez: the technology called network cameras a few years ago have emerged. There is also a site called [Earthcam](#), which can be seen all over the world captured by the camera in real-time scenes. Links from the Web site can be seen above, this map is from the site, the specific location of the United States, 1552 Broadway, New York.

In addition, some users also found Moscow, The Statue of Liberty, Canada, London and other places of the network camera filmed by real-time images, never link to web site to share with other users.

The use of the network camera, remote viewers do not need any professional software, the browser can only

real-time monitoring of its image. This peace with MSN, QQ instant messaging tools such as video chat technology similar. "I remember when I was on Google I was able to enter some code to look at things with a real-time dynamic images, I do not know whether this feature was still alive?" Google's technology is the key to enter special words, then search thousands of cameras to the IP address, and then install a plug-in, they will be able to see real-time images taken. Of course, most of them are installed on the building top, parks and other public places without a camera network encryption. Engaged in IT industry, said Mr. Xie, a few years ago to take advantage of the technology easy to watch English Premier League Chelsea a corner of the stadium scenes, but with the strengthening of the network supervision, remote watch this video more and more difficult approach.

Individuals should be enhanced with network security protection

As we all know, the network camera uses a wide range of, for example, it allows you to sit in the offices and monitor their homes, watch children play, such as the role of fire security. However, the resulting people is a great headache: how to avoid illegal use of network elements to implement peeping camera video taping of activities?

For this problem, another IT person Mr. Sun told reporters that can be long-range surveillance camera is first connected to the public online, through the company's internal network to monitor the camera is not included. In addition, individual family camera as long as the horse to avoid viruses, do a good job in security work, these cameras are usually safe, do not have to worry too much about it.
